Bozeman, the coming city of Montana, the most prosperous state in the Northwest, is now recognized as most surely to be the future capital, and this is the city for a safe investment. Res. estate is now cheaper than in any city of its size and advantages. Money now invested here is sure to bring quick r-turns and large profits. The cheapest inside properties are now held by the Minneapolis Byadicate, and R. R. Finlay, the agent who is local d in Bozeman, is rapidly selling blo. ks and lots to Bozeman, is rapidly selling blo. ks and lots to Bozeman citizens, who are taking advantage of the low prices of property on which to build homes before prices advance, Syndicates are forming and endeav ring to purchase the additions off Cap tol Hill, Park and Spring Brook, knowing they can advance prices of per cent, and sell the property rapidly. The limes addition mas already been bought of the admeapolis Byndicate by a Butte and Bozeman Syndicate, and if you look over the tapitol Hill, Park and Spring Brook additions, get prices and compare their with prices of lots in other additions you will not care to look further. The above additions are in the finest resident portion of the city and are within five bleess of the post office, two blocks of the Court house, and eight blocks of the new Bozeman hotel. Blocks of 24 lots are being sold in Capi al Hill Addition for \$50 to \$125 per lot. Our terms are the most liberal officed and will suit any one. For further information call on or write to Mr. R. R. Finlay, wno represents these additions excanively. Office in Bozeman City Hall, opposite the Bozeman hotel.

FACTS ABOUT BOZEMAN.

Chief among Bozeman's resources is its rich inheritance in the soil of the Gallatin valley. It ites at the head of this superb valley, which is 30 by 40 miles in extent. One-half of the wheat, oats, barley and vegetables raised in Montana, is produced in this valley. It has the best of all protective tariffs against outsid-competition in the freight tariff. Owing to the pientiful water, the protective tariffs against outside competition in the freight tariff. Owing to the pientiful water, the crops of the valley never fail to yield enormously. Its totals foot up annually 10,000,000 pounds of oats, now selling at \$1.65 in Bozeman, 25,000,000 pounds of wheat, and 25,000,000 to 25,000,000 pounds of barley. The mills manufacture 18,000,000 pounds of flour. In addition are the small products in raising which fortunes are being made. On the farm of R. P. Menefee in the year 1876 there was raised an average of 66 bushels of oats per acre on 70 acres. In 1877 on the same number of acres the average was 65 bushels; and 1875, 65 bushels; in 1880 on 100 acres, 48 bushels; in 1881, 77% bushels; in 1882, on 114 acres, 85 bushels, and in 1883, on 130 acres, 54% bushels. That is an unbroken record of big crops for 10 years, and Mr. Menefee's neighbors have similar stories to tell. In fact, 110 bushels of oats have been raised to the acre in this valley, and from 45 to 65 bushels of wheat.

Situated in this rich agricultural c unity no fear is felt that Bozeman will cease to grow in population and wealth. On the outskirts of this marvelous valley are many valuable mines of copper and silver. Many mineral locations are being developed and now promise rich rewards to those who own them.

per and silver. Many mineral locations are being developed and now promise rich rewards to those who own them.

Coal mines within three miles of the city supply the city with coal.

Much eastern capital is being spent in and about Bozeman and the next year bids fair to see Bozeman the scene of many enterprises which will distribute large sums of money. Thes are now arriving for the electric railway, and in the early spring an oat meal mill will be built. Just west of Eozeman a few miles, at the new lown Manhatton, milling works, the largest in the United S atea, are being built. Bozeman has enough new enterprises under way and enough industries in sight to insure greater prosperity within the next two years than has ever been witnessed in any five years of its existence.

to insure greater prosperity within the next two years than has ever been witnessed in any five years of its existence.

Bozeman is fast becoming noted as a health resort. The Ferris Hot Springs are only seven miles from the city and can soon be reached by electric cars. The water from these springs has been tested by hundreds of invalids in the past few years with gratifying results. They will now be tashed to the from by Mr. Ferris who lately purchased them from Mr. Jerry Mathews and in a few years this resort, which is already widely and favorably known throughout the east, will rival the most noted springs in the world.

In the race tor pre-emit ence, its location, beauty of surroundings, natural wealth and permanence of resources, all point to Bozeman as a winner. As the last decade has seen Denver grow into the Queen City of Colorado, so it is not to be questioned that the closing decade of this century will see Bozeman out-stripping its rivals and become known throughout the world as the Garden City of the Bozeky Mountains.

If you want a healthy, busy, ambitious, enterprising city for a home, one that is unsurpassed for beauty of surroundings, come to Bozeman. We have a first-class academy, splendid public schools, nice churches and an intelligent community. The field is rich for investments and those who delay catching on now while a small sum of money will go a long ways are the losers.

KOCH'S LYMPH

A FEW PLAIN FACTS-

ALLATIN VALLEY produces more grain than all the rest of Montana. 500,000 bushels of oats, 200,000 bushels of barley, and 300,000 bushels of wheat, a grand total of 1,000,000 bushels, is about an average crop for the Gallatin ROOM & Valley. Nelson, Story & Cc.'s mill grinds all the wheat grown in the Gallatin Valley. Grinds more wheat than all the other mills combined in the state of Montana. This mill grinds steadily day and night. Has a mill race three miles in length to conduct the water to the wheel. Has one immense engine of 125 horse-power. The mill and store houses cost \$ 100,000. It is the most thoroughly equipped plant in the Northwest, being Full Roller process and of the latest improved machinery. The flour from this mill is shipped all over Montana and into the Dakotas. Every sack is guaranteed to be first-class. Only the best millers are employed. Try a sack of the flour made by this mill and be convinced.
